

VISHWAJEET

Senior Software Engineer | Full Stack Developer (Java, Spring Boot, Angular)

Noida, India | vishwajeetvk17@gmail.com | +91-8210147086

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience in Java, Spring Boot, Angular, and PostgreSQL. Experienced in building end-to-end web applications, solving problems, collaborating with teams, and delivering scalable solutions on time.

CORE SKILLS

Languages: Core Java, JavaScript, TypeScript, SQL

Backend: Spring Boot, Spring Data JPA, RESTful APIs, Microservices Architecture, Kafka, Debezium

Frontend: Angular (v10-v18), HTML, CSS, Ag-Grid, Chart.js, Highcharts, ApexCharts

Database: PostgreSQL, Microsoft SQL Server (MSSQL)

Security: JWT, OAuth, SSO, Okta, RBAC (Role-Based Access Control)

Tools & Platforms: GitLab, IntelliJ, Eclipse, Postman, Swagger, MS Office

Methodologies: Agile/Scrum, SDLC

WORK EXPERIENCE

Senior Engineer | Motherson Technology Services Limited | Noida, India

September 2024 - Present

- Provide end-to-end production support, proactively troubleshooting and resolving critical application issues to ensure high system availability and stability.
- Collaborate directly with clients for requirement gathering, technical analysis, and solution clarification, translating business needs into scalable technical designs.
- Design and architect end-to-end project solutions using Java (Spring Boot) and Angular, establishing coding standards and technical direction for the team.

Engineer | Motherson Technology Services Limited | Noida, India

July 2022 - August 2024

- Developed backend services using Spring Boot, ensuring high performance, scalability, and long-term maintainability of enterprise applications.
- Designed and implemented RESTful APIs and microservices architecture, enabling modular development and seamless inter-service communication.
- Integrated Debezium with Kafka JDBC Sink Connector to enable real-time database replication across multiple servers.
- Implemented secure authentication and authorization using JWT tokens, SSO, and OAuth to protect application access.
- Built end-to-end dashboards and operational screens by integrating Angular front-end with Spring Boot back-end services.
- Migrated multiple projects from Angular 10 to Angular 18 and modernized legacy Struts applications to Angular + Spring Boot.
- Partnered with cross-functional teams during Agile sprints, consistently delivering high-quality features on schedule.

Engineer Trainee (Intern) | Motherson Technology Services Limited | Noida, India

January 2022 - June 2022

- Gained hands-on experience with core Java concepts including OOP principles, data structures, and debugging techniques.
- Assisted in identifying and resolving software bugs, contributing to improved code performance and application stability.
- Participated in peer code reviews, learning industry best practices and efficient coding techniques.
- Collaborated with team members using Git version control to manage and track code changes.

PROJECTS

Mi Pay - *(April 2026 - Present)*

- Developing an enterprise invoice management application that displays and enables editing of invoice data extracted via AI-based OCR models built by the AI team.
- Built backend services to fetch and process AI-extracted invoice data, exposing web services for tenant details, menus, RBAC permissions, and invoice data operations.
- Designed interactive analytical dashboards using ApexCharts to visualize invoice trends and support data-driven decision-making.
- Used Spring Data JPA for backend data persistence and the CAF framework as the core development framework for the application.

CAF - *(August 2024 – March 2026)*

- Designed and implemented RESTful APIs and microservices architecture, enabling modular development and seamless inter-service communication.
- Implemented login authentication using JWT tokens, SSO, and Okta, ensuring secure user access across the platform.
- Created reusable Java-based functions and JAR libraries for shared use across multiple projects, improving development efficiency.
- Implemented Debezium with Kafka JDBC Sink Connector to replicate database changes across multiple servers in real time.

CCS - *(October 2023 - July 2024)*

- Developed RESTful APIs with Java Spring Boot and integrated them with an Angular front-end for smooth client-server communication.
- Migrated the project from Struts to Angular + Spring Boot, modernizing the technology stack and improving maintainability.
- Implemented file upload/download functionality and enhanced data grids using ag-Grid for improved user interaction.
- Designed dashboards and reports using Highcharts, improving data visualization and decision-making.

CPS - *(May 2022 - Present)*

- Built dynamic and responsive UI components with Angular, enhancing usability and delivering a seamless user experience.
- Implemented Excel/Word/PDF export and import functionality and interactive dashboards using Chart.js for real-time updates.
- Independently developed multiple front-end screens and migrated the project from Angular 10 to Angular 18.
- Currently Providing end-to-end project support, including production issue resolution and new enhancements ensuring stable application performance.

EDUCATION

B.Tech - Computer Science and Engineering | Guru Nanak Dev University, Amritsar

June 2018 - June 2022 | CGPA: 7.9

Higher Secondary School (12th) & Secondary School (10th) | Kendriya Vidyalaya, Pathankot (CBSE Board)

2014 - 2018 | 12th: 66.6% | 10th: 9.4 CGPA

LANGUAGES

Hindi: Native / Bilingual Proficiency

English: Full Professional Proficiency
